Summary

Software Engineer with expertise in full-stack development and scalable system architecture. Proficient in Python, JavaScript, and SQL. Focused on building efficient, high-performance applications and optimizing backends for seamless, user-centric experiences. Passionate about leveraging cloud-native technologies to solve complex enterprise-level challenges and drive digital transformation through robust code.

Skills

Languages:	Python, JavaScript, SQL, Java
Web Technologies:	HTML, CSS, JavaScript, React, Node.js, Express.js
Databases:	MySQL, MongoDB
Tools & Platforms:	Git, GitHub, VS Code, Postman
Concepts:	REST API Basics, CRUD Operations, Data Structures & Algorithms
Soft Skills:	Problem Solving, Teamwork

Experience

Software Engineering Intern

Jan 2025 – Feb 2025

Technohack Solutions

- Developed RESTful backend APIs using Node.js and Express.js to support CRUD operations and application workflows.
- Worked on MySQL database design and optimization using indexing and query structuring for improved performance.
- Integrated backend services with frontend components to ensure seamless data flow and enhanced user experience.
- Performed debugging, testing, and error handling to improve application reliability and maintainability.
- Collaborated with team members using Git and GitHub for version control and project management.

Projects

Airbnb — React, Node.js

Feb 2026 – March 2026

- Developed a full-stack Airbnb-inspired platform with authentication and property booking features.
- Implemented CRUD operations and review management using Node.js and MongoDB.
- Designed a responsive user interface for seamless listing and booking experience.

Feeding Hands — Firebase, Node.js

March 2026 – April 2026

- Built a food donation platform connecting donors and receivers in real time.
- Integrated location-based coordination and food listing management features.
- Implemented authentication and database operations for secure user access.

BotAnalyst — Python, Streamlit

April 2026 – May 2026

- Created an AI-powered chatbot for CSV and Excel data analysis.
- Integrated automated insights and chart generation using Python and Streamlit.
- Enabled natural language querying for simplified business data analysis.

Education

Bachelor of Engineering (Computer Engineering)

Siddhant College of Engineering, Pune

2022 – 2026

CGPA: 8.0/10

Relevant Coursework: Data Structures, Operating Systems, Database Management Systems, Distributed Systems, Computer Networks
