Summary

Software Developer with strong skills in full-stack web development and data analysis. Proficient in Python, JavaScript, SQL, and modern web technologies like React.js and Node.js. Experienced in building real-world projects including e-commerce, food donation, and AI-based analytics systems. Skilled in developing REST APIs, managing databases, and creating interactive user interfaces. Passionate about solving real-world problems through efficient and scalable software solutions.

Skills

Languages: Python, JavaScript, SQL, Java

Web Technologies: React.js, Node.js, Express.js, HTML, CSS

Databases: MySQL, MongoDB

Data & Analytics: Data Cleaning, EDA, Power BI, Excel

Tools & Platforms: Git, GitHub, REST APIs, Postman

Soft Skills: Problem Solving, Team Collaboration, Technical Communication

Experience

Software Engineering Intern

Jan 2025 – Feb 2025

Technohack Solutions

Tools: Node.js, SQL

- Developed RESTful backend APIs using Node.js to support CRUD operations and application workflows.
- Worked on SQL database design and optimization using indexing and query structuring for better performance.
- Integrated backend services with frontend components to ensure smooth data flow and user experience.
- Performed debugging and testing of application features to improve reliability and error handling.

Projects

Airbnb Clone | *React, Node.js*

Feb 2026 – March 2026

- Developed a full-stack Airbnb-inspired platform with authentication and property booking features.
- Implemented CRUD operations and review management using Node.js and MongoDB.
- Designed a responsive user interface for seamless listing and booking experience

FeedingHands | *Firebase, Node.js*

March 2026 – April 2026

- Built a food donation platform connecting donors and receivers in real time.
- Integrated location-based coordination and food listing management features.
- Implemented authentication and database operations for secure user access.

BotAnalyst | *Python, Streamlit*

April 2026 – May 2026

- Created an AI-powered chatbot for CSV and Excel data analysis.
- Integrated automated insights and chart generation using Python and Streamlit.
- Enabled natural language querying for simplified business data analysis.

Education

Bachelor of Engineering

2026

Siddhant College, Pune

CGPA: 8.0/ 10

- Relevant Coursework: Data Structures, Operating Systems, Database Management Systems, Distributed Systems, Computer Networks.
